

Verify the worker. Capture the leaf weight. Keep one clear record.

GardenSuite helps tea estates record face-verified hazira and green leaf weight from one Android field app. The field work continues without internet and syncs when a connection is available.

FACE CHECK

Worker identity is checked before hazira is saved. This helps stop proxy attendance.

SMART SCALE

Bluetooth sends the kg reading to the same verified worker record.

OFFLINE FIELD WORK

Attendance and weighing continue even when mobile internet is not available.

OFFICE REPORTS

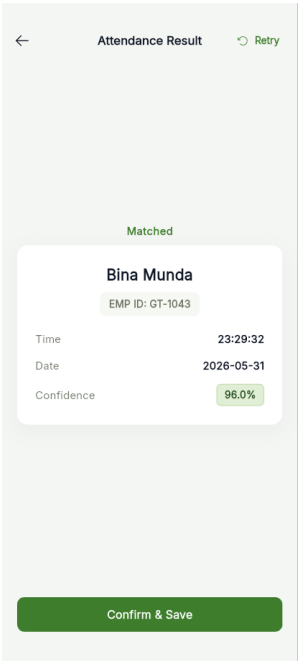

Synced data is ready for daily review, Excel export and payroll workflow.

Built and supported by Sarbani Associates for tea garden work.

One field flow for attendance and weighing

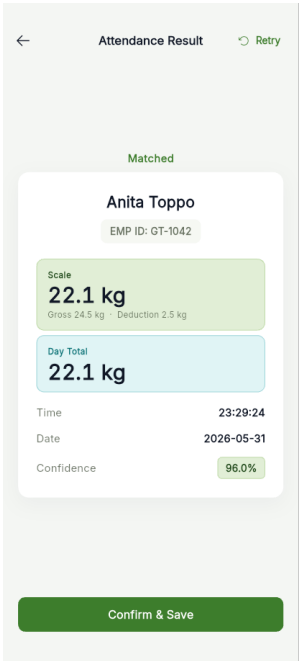

The supervisor uses the same Android app for worker enrollment, attendance, work punches and plucking weight.

1. Enroll	2. Verify	3. Weigh	4. Save and sync
Capture worker face images and link them to the employee code.	Use the phone camera to check the worker before attendance.	Bluetooth sends kg from the scale. Manual entry is available as a fallback.	Save locally without internet. Sync later to the office and dashboard.

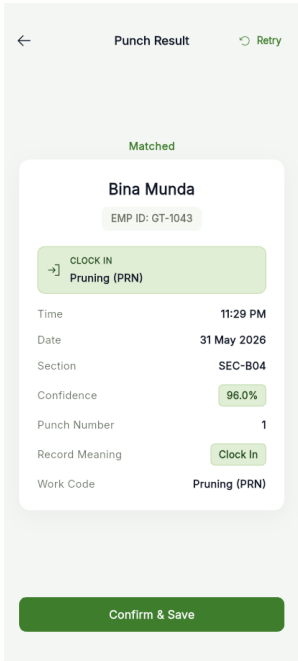

Face attendance result

Shows worker, employee ID, local time and match result before saving.

Leaf weight linked to worker

Shows scale weight, deduction, net weight and day total for the worker.

Clock-in and clock-out

Records work code, section and local timestamp for general garden work.

Made for practical tea garden conditions

Capability	GardenSuite response
Attendance method	Facial recognition through an Android phone. Fingerprint/thumb attendance is not included in the current field solution.
Weighing hardware	One standard 50 kg Bluetooth smart hanging scale per weighing point. Final make, accuracy/graduation and battery details are confirmed before order.
Working times	Face-verified clock-in and clock-out for general work. Sessions record start and end time. Plucking entries keep their individual capture time.
Internet	Not required for field attendance or scale-to-phone Bluetooth. Required later for sync, dashboard access, updates and remote support.
Existing software	Standalone use needs no other ERP. GardenSuite ERP can receive the records directly. Other payroll or ERP integration needs a format review and may require separately quoted work.
Client-provided items	Compatible Android phones, charging/electricity, internet at a sync point, and the hanging frame or stand unless separately listed.
Warranty and support	One-year scale warranty for manufacturing defects. Phone, WhatsApp and remote support are included with the active software plan.

DEMO AND WORKFLOW REVIEW	SETUP AND TRAINING	ONGOING SUPPORT
Confirm weighing points, supervisors, phones, worker master data, existing software and required reports.	Configure the app and scales, enroll workers, test field capture and train supervisors and office staff.	Use phone, WhatsApp and remote desktop support first. On-site visits are scheduled when physical work is required.

BOOK A DEMO See the workflow with your own field team.
