

TEA GARDEN MANAGEMENT, REINVENTED

The complete ERP for tea estates.

Face recognition attendance. Smart wireless weighing. Payroll, accounts, factory,
and cloud reporting - all in one system that works offline where your garden is.

THE CHALLENGE

Every tea estate loses money to problems it cannot see.

Manual systems create gaps. Gaps create losses. Most estates don't realize how much they leak through attendance fraud, weight errors, and delayed decisions - every single day.

Proxy Attendance

Workers punch in for absent colleagues. Paper registers have zero verification. You pay for people who aren't working - and you'll never know the real number.

Weight Disputes

Plucking weights recorded by hand, copied into another register, then typed into a computer. Every handoff is a chance for error, manipulation, or delay.

Blind Decisions

Production and labor data arrives late - sometimes the next day. You manage a live operation on yesterday's numbers. Opportunities and problems go unnoticed.

Disconnected Records

Attendance in one place. Weighing in another. Payroll in a third. No single view of what actually happened today. Reconciliation burns hours weekly.

GardenSuite eliminates all four problems.

One connected system replaces paper registers, manual weighing, separate payroll software, and delayed reporting with a single, verified chain of data - from the garden gate to your phone screen.

WHAT MAKES US DIFFERENT

Two technologies no other tea ERP offers.

BREAKTHROUGH 1

Face Recognition Attendance

Every worker verified by their face at the garden gate. No proxy punching. No buddy punching. No paper registers. The verified identity follows every record - from attendance to kamjari to payroll.

BREAKTHROUGH 2

Smart Wireless Scale

Tea leaf weight captured wirelessly and linked to the verified worker instantly. No manual notebooks. No copying errors. No disputes. One weigh, one record - weight data flows directly into processing and payroll.

Works Fully Offline

No internet at the garden? No problem. Full operation runs offline. Data syncs automatically when connected.

Zero Manual Entry

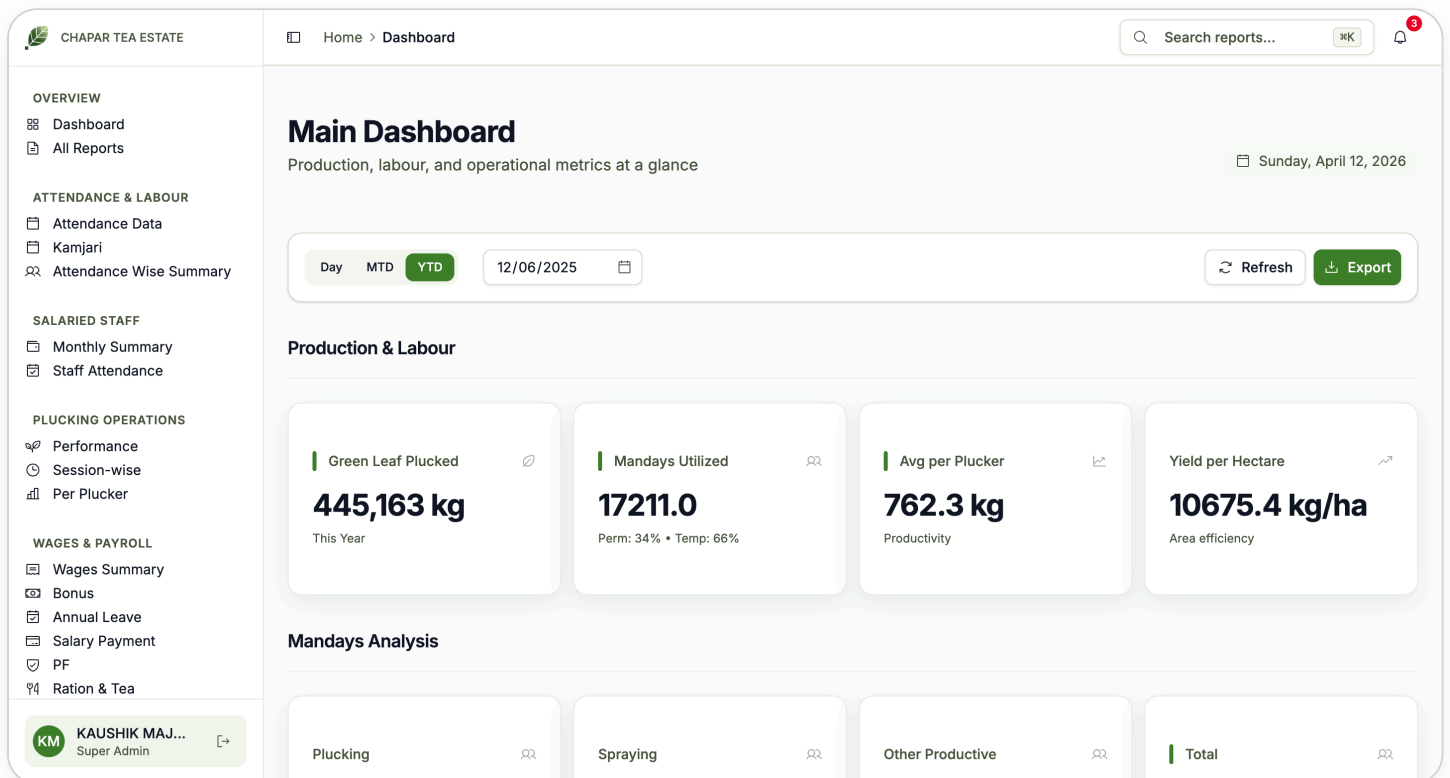

Face verified, weight captured, record created. No handwriting, no re-typing, no room for manipulation or mistakes.

One Verified Chain

Identity, attendance, weight, kamjari, payroll - every step linked to a real, verified worker. End-to-end accuracy.

Everything your estate needs. One system.

Beyond attendance and weighing, GardenSuite covers every department - payroll, factory, accounts, stores, bought leaf, and cloud reporting. Your team learns one system and uses it everywhere.

Payroll & Kamjari

Attendance-linked wages, kamjari calculation, bonus, PF, ration - every payroll task flows from the same verified data.

Factory & Accounts

Factory production tracking and estate-level finance and reporting. One unified view across all operational departments.

Cloud MIS Dashboard

Real-time production, labor, and financial data on your phone, tablet, or laptop. View your estate from anywhere, updated daily.

Offline + Cloud Architecture

Full ERP runs locally at the garden with zero internet dependency. Data syncs to the cloud dashboard when connected.

20+
ESTATES

7
REGIONS

25+
YEARS

Trusted across Darjeeling, Dooars, Assam, Terai, and beyond.

GardenSuite has been running in real tea estates since 2000 - refined through 25+ years of practical use.

NEXT STEPS

See it working on your estate.

We will show you face attendance, smart weighing, payroll flow, and the cloud dashboard in one practical session at your garden.
