

GardenSuite Demo Strategy Guide

A structured playbook for delivering a high-impact, 30-minute demo to a new tea estate client.

Meeting Flow: The "Diagnostic Open"

Do **not** just start showing screens, and do **not** ask "what do you want to see" from a blank slate. Instead, use a **3-minute diagnostic introduction** to align the demo to their specific operational pains.

Step 1: The Alignment Question (First 3 Mins)

Before showing any software, say:

"Thank you for taking the time to meet today. Every tea estate operates a bit differently and has its own unique bottlenecks. To make sure I do not waste your time showing menus you do not care about, may I ask: what are the biggest operational challenges you are currently trying to solve? Is it controlling worker attendance and proxy punching, stopping leaf weight write-down errors in the field, or the manual work required to compile payroll?"

Step 2: Listen and Pivot

[object Object]

Step 3: Run the Structured Walkthrough (20 Mins)

Follow the conversational script below. Emphasize their pain point, but stick to the end-to-end value loop so they see the entire system working as one.

Step 4: Interactive Deep Dive (5 Mins)

Once you show the Excel export, say:

"Now that you have seen the overall flow from the field to the office and the cloud, is there any specific report, configuration, or module you would like us to click into and look at in more detail?"

1. Demo Architecture: The "Value Story" (30 Mins)

Instead of a generic 4-hour menu-by-menu tour, structure the demo around the **life of a single plucker and their harvest**. This shows end-to-end value in minutes.

```
graph TD
```

```
A[1. Office Backbone - VB6 Local ERP] -->|Sync master con  
B -->|Offline weights & punches| C[3. Office Database - L  
C -->|Cloud Sync Agent| D[4. Cloud Stream - mis.gardensui  
D -->|Real-time KPIs & Reports| E[5. ERP Excel Export & P
```

Phase 1: The Hook (2 Mins)

[object Object]

[object Object]

Phase 2: The Core Desktop ERP - VB6 (5 Mins)

[object Object]

[object Object]

Phase 3: Live Garden Video & Field Flow (8 Mins)

[object Object]

[object Object]

Phase 4: Cloud Dashboard & Real-Time Stream (7 Mins)

[object Object]

[object Object]

Phase 5: Specialized Reports & Payroll (6 Mins)

[object Object]

[object Object]

Phase 6: Wrap-up & Trust (2 Mins)

[object Object]

2. Tailoring the Demo to the Client

Adjust the focus based on who you are speaking to:

If the client is the MD or Estate Owner

[object Object]

[object Object]

If the client is the General Manager or Garden Manager

[object Object]

[object Object]

If the client is the IT Head or Head Accountant

[object Object]

[object Object]

3. Conversational Demo Script (What to Say & Click)

Showing the software directly is the best option for tea garden clients. They are practical, hands-on operators who value real tools over PowerPoint slides. Real screens build immediate trust.

Use this simple, conversational guide to steer your live walkthrough.

Phase 1: The Desktop Office ERP (VB6)

[object Object]

[object Object]

Phase 2: The Field Capture (Live Video)

[object Object]

[object Object]

Phase 3: The Cloud Dashboard (mis.gardensuite.in)
